PROFESSIONAL SUMMARY

Front-End Developer with strong Full Stack foundations, specializing in React.js, Next.js, and Angular with NgRx and Redux Toolkit for scalable state management. Completed a 6-month Route Academy Front-End diploma and the NTI MEAN Stack Career Accelerator, building responsive, SEO-optimized SPAs and integrating REST APIs, authentication, and real-time features. Seeking a Front-End or Full Stack role at a product company or agency in Egypt.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js (SSR/SSG), Angular, NgRx, Redux Toolkit, Context API, Zustand

Styling: Tailwind CSS, Bootstrap

Tools: Git, GitHub, Postman, Stripe, Clerk, JWT, Sanity CMS

Backend: Node.js, Express.js, NestJS, MongoDB (Mongoose), REST APIs, Socket.io

Concepts: OOP, SOLID Principles, Design Patterns, Auth & Authorization, Agile/Scrum, SEO Optimization

PROJECTS

Fashion Store E-Commerce Platform

May 2026 – Jun 2026

Node.js, Express.js, MongoDB, Angular, NgRx

Backend: github.com/Nour5Eldin/fashion-store-backend

Frontend: github.com/Nour5Eldin/fashion-store-frontend

- Implemented NgRx state management in an Angular frontend, handling product catalog, shopping cart, and user session with predictable, unidirectional data flow.
- Built a responsive Angular UI consuming a RESTful Node.js/Express backend with 66 API endpoints across 11 MongoDB models, including JWT authentication and role-based views for Admin and User.
- Collaborated across the stack on data modeling for products, orders, users, and categories to ensure the frontend and API contracts stayed in sync.

Fresh Cart E-Commerce Platform

Aug 2025 – Oct 2025

Next.js 14, TypeScript, Sanity CMS, Stripe, Clerk

Live: freshcart-llc.vercel.app

GitHub: github.com/Nour5Eldin/FreshCart.LLC

- Developed a 20-page full-stack e-commerce application using Next.js 14, leveraging SSR and SSG to optimize page load performance and improve SEO rankings.
- Built the complete checkout UI/UX, integrating Stripe for payments and Clerk for authentication end-to-end.
- Consumed a headless Sanity CMS backend, enabling dynamic product management without code changes.

EDUCATION & TRAINING

MEAN Stack: Web Developer Career Accelerator

Mar 2026 – Jun 2026

National Telecommunication Institute (NTI), Giza, Egypt

- Implemented full-stack MERN/MEAN applications with JWT security, Socket.io real-time communication, unit testing, and Agile/Scrum team practices.

Front-End Development Diploma

Mar 2025 – Aug 2025

Route IT Training Center, Giza, Egypt

- Completed an intensive 6-month program covering React.js, Next.js, TypeScript, and advanced async JavaScript, delivering projects focused on state management and performance optimization.

Bachelor of Computer Science

Aug 2019 – Jul 2023

Thebes Higher Institute of Computer & Management Sciences, Cairo, Egypt

- Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Web Development, OOP.
